M Abrar Ahmed

Front-End Developer | Empowering Clients with React.js, Next.js,
JavaScript & Tailwind CSS

Sargodha Division, Punjab, Pakistan

Summary

I'm a passionate front-end developer with over a year of experience in building user-friendly websites and web apps. I specialize in working with technologies like React.js, Next.js, JavaScript, Tailwind CSS, and Bootstrap to create responsive and easy-to-use interfaces. My focus is on turning great design ideas into working code while ensuring everything runs smoothly and performs well.

In my year at CoderzPark, I worked on various projects that helped me improve my problem-solving skills and attention to detail. I gained a strong understanding of modern web development, especially in creating clean and maintainable code using React.js and Next.js. I also learned how to build responsive designs using Tailwind CSS and Bootstrap, ensuring that websites perform well on any device. My goal is to keep growing my skills and work on projects that push the boundaries of web development.

I'm currently looking for opportunities where I can use my skills to create great digital experiences. I'm especially interested in roles where I can work with teams, learn new things, and contribute to exciting projects. I want to use technologies like React.js, Next.js, and CSS frameworks to build engaging and smooth web apps. If you're looking for a dedicated developer who's eager to learn and grow.
